

Run2You -Technical Rider- Run2You

General Terms

To avoid any delay the following settings regarding stage set up, light & sound should be all checked and up and running at time the BAND arrives.

If possible a complete line / Channel check should be successfully performed for a time saving sound check with the band on stage.

Stage

A minimum requirement : (6 (w) x 4 (d) x 0.8 (h)) all in meters.

A Riser for the drums is to be placed accordingly to our stage plan/setup information attached.

Open air events can be fantastic and we are happy to play outside but would need a suitable area such as a covered stage or marquee/gazebo for example. Potential rainfall etc needs to be taken into account with suitable rain coverage also on the stage sides.

Channel settings

We need 20 Channels and 6 AUX / Returns

Ch	Instrument
1	Hi Hat (left)
2	Bass drum
3	OverHead left
4	OverHead right
5	SnareTom
6	Tom1
7	Tom2
8	Tom3
9	Floor Tom1
10	Floor Tom2
11	KLICK <u>only for Drum IN Ear Aux Ch 1</u>
12	SnareTom 2 (Sidesnare)
13	Lead VOCAL Daniel
14	BacVoc 1 Melanie
15	BacVoc 2 (optional)
16	E BASS ToTo
17	Guitar Chris
18	Guitar Chris Acoustic
19	Guitar Mario
20	Sample Player/ PAD (optional)

Monitoring/Returns Channels

For Stage Monitoring Our requirements are as follows:

2 Monitors in the middle / front on Stage (for Vocals)

subsequently each 1 Monitor for:

Returns Channel	Bandmember
1 IEM	Udo (Drums)
2	ToTo(Bass)
3	Chris(Guitar)
4	Mario(Guitar)
5	Stagemonitor Front L+R
6	Stagemonitor Front L+R

All needed in-ear Monitoring router and instrument radio transmitters will be supplied by us

LIGHT

A suitable and well dimensioned light installation according to stage space should be available, if possible with moving light effects and a light technician at place during performance

PA/SOUND

A professional PA / Sound instalment, capable of loudness of minimum 100 dB undistorted in front of stage.

Rule of thumbs: 3kW (kilowatt) RMS (Root Mean Square) each side of stage for each 500 guests.
